Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Editorial changes to the spec. and claims will be made in the response. In addition, claim 1 will be amended to better specify that the density is for the crosslinked rubber and rubber product and not for the isobutylene copolymer as originally interpreted by examiner. Claim 3 will be amended to a "method for" versus a "method of". Mr. Davis explains that the criticality of the density can be found in tables 1 and 2 of the specification. Examiner agrees to respond to all arguments when an official response is sent to the Office. .
